

**Amendments to the Specification:**

Please replace the paragraph beginning at page 11, line 10 with the following amended paragraph:

In the above method, step a) may also include the steps of:

- i) producing a negative mold 34 of the bottom surface P of the foot, as shown for example ~~[[is]]~~ in Figure 4;
- ii) modifying the negative mold 34 to produce a corrected negative mold based on the specialist patient assessment and clinical measurement deficiencies of the foot to correct for the anatomic biomechanical deficiencies of the foot;
- iii) producing a positive mold 36 from the corrected negative mold, as shown for example in Figure 5; and
- iv) modifying the positive mold ~~[[32]]~~ 36 to produce the corrective positive mold 32 based on the specialist patient assessment and clinical measurement deficiencies of the foot to further relieve or add pressure so as to further correct for the anatomic biomechanical deficiencies of the foot, as shown for example in Figure 6.
